# MDPI – Mission

*“MDPI’s mission is to promote **open scientific exchange** through scholarly open access journals, and scientific communication projects across all disciplines.”*

# About MDPI

A pioneer in scholarly, open access publishing since 1996

## Facts and figures:

**450+** open access peer-reviewed journals across all categories

**97%** of MDPI articles are covered in Web of Science.

**72%** of our WoS & **80%** of our Scopus journals are in Q1 or Q2

**180+** affiliated societies and research organizations

**1,500,000** publications

**655,000+** Submissions and **285,000+** Articles published in 2023

**3,500,000+** authors

**6000+** employees across 21 offices in 12 countries

## MDPI – Memberships

## MDPI - Initiatives

# MDPI – Journal Development & Indexing

MDPI journals are indexed in every top database, including **Web of Science, Scopus, and DOAJ**.

We also prioritize coverage in scope-specific databases, such as **PMC, PubMed, MEDLINE, Inspec, CAS, FSTA, and more**.

## 2023 Updates

- **57 new acceptances in Scopus**, bringing the total number of MDPI journals covered in Scopus to 274.
- **29 new acceptances in Web of Science**, resulting in a total of 251 MDPI journals covered in Web of Science. **97% of MDPI articles are covered in Web of Science.**
- **82 MDPI journals added to the Directory of Open Access Journals (DOAJ)**, for a total of 400 MDPI journals in the DOAJ, the second-highest count for any publisher.

## 2023 Impact Factor

**72% of our ranked MDPI journals (171 of 237) are ranked above average, in Q1 or Q2.**

## 2023 CiteScore

- 274 MDPI journals received a CiteScore
- 57 journals received a CiteScore for the first time
- 162 journals had an increased CiteScore from the past year, by an average of 38%
- 23 journals ranked in the top 10%
- 80% of MDPI journals have a score that ranks them in Q1 or Q2 in at least one category
- 97 journals (35%) ranked in Q1 (top 25%) of journals (in at least one category).

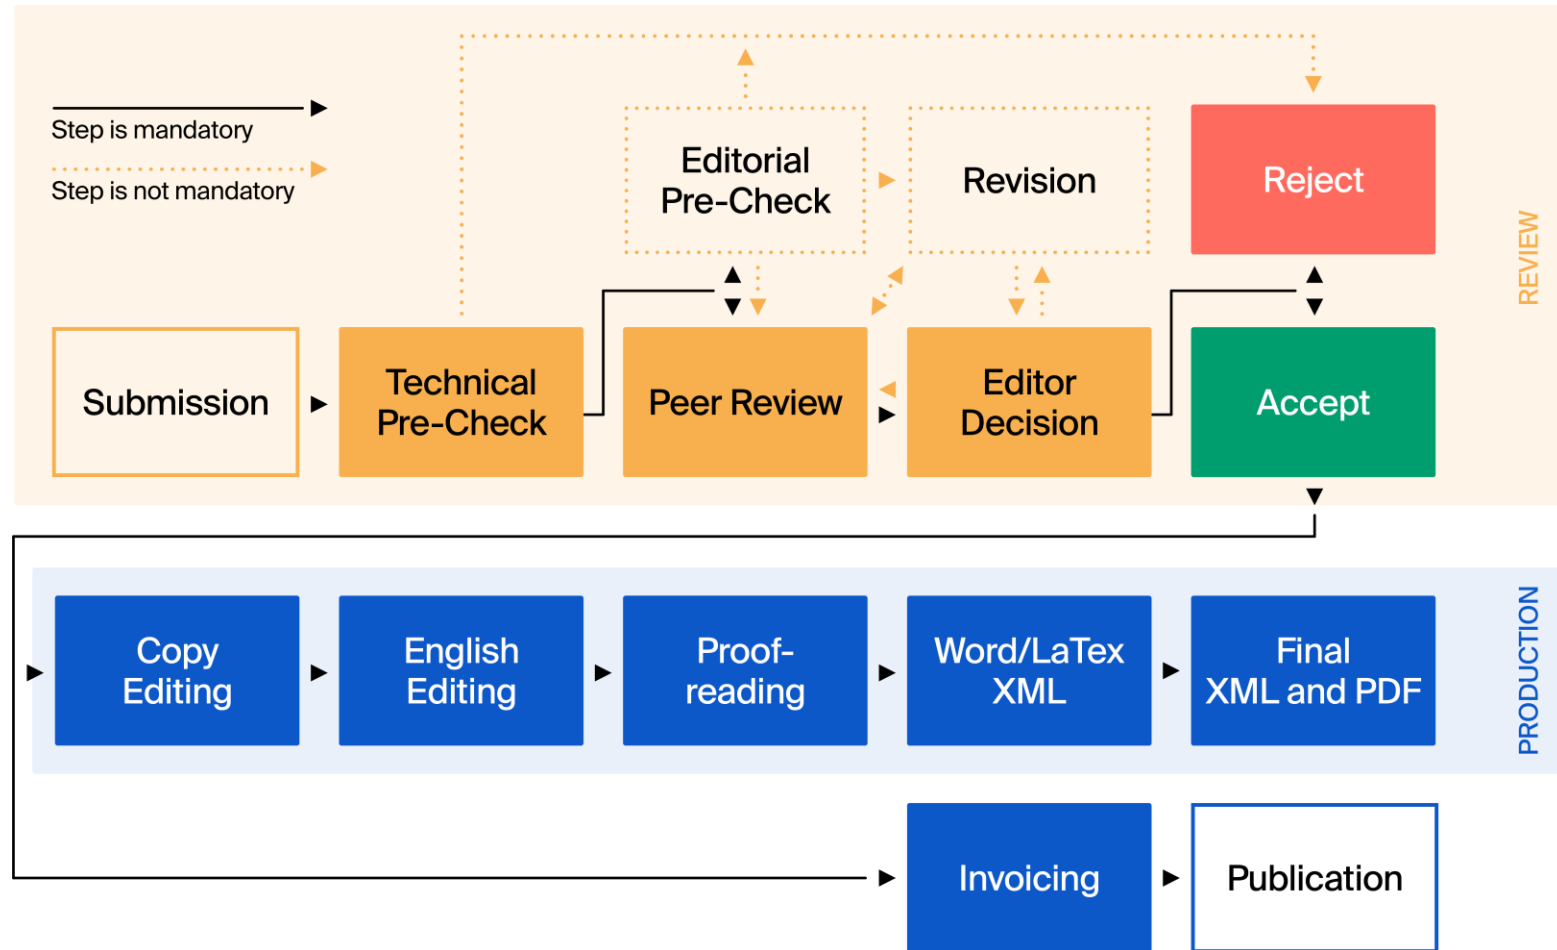

Academic Open Access Publishing  
since 1996

# MDPI – Editorial Process

# The MDPI Editorial Process

- All of our journals are peer-reviewed
- All journals follow the same editorial process
- All articles follow the same editorial process
- An academic editor is always associated with every paper

# Evaluation criteria for articles

## General:

- ✓ Originality/novelty
- ✓ Significance of content
- ✓ Quality of presentation
- ✓ Scientific soundness
- ✓ **Ethical concerns**
- ✓ Overall merit

## Content:

- ✓ Does the introduction provide sufficient background and include all relevant references?
- ✓ Is the research design appropriate?
- ✓ Are the methods adequately described?
- ✓ Are the results clearly presented?
- ✓ Are the conclusions supported by the results?
- ✓ Are there appropriate and adequate references to related and previous work?

# Overview of MDPI Editorial Process

Underlining principles:

**Fast and fair peer review.**

**Fast dissemination of research** that allows reproducibility and validation.

Any **valid, sound research** should be published, including negative results.

The significance of an article should not be judged by only reviewers and an editor, but by the **community** at large.

Maintaining high academic standards and trustworthiness requires robust editorial practices, stringent ethical standards, and comprehensive and consistent quality metrics.

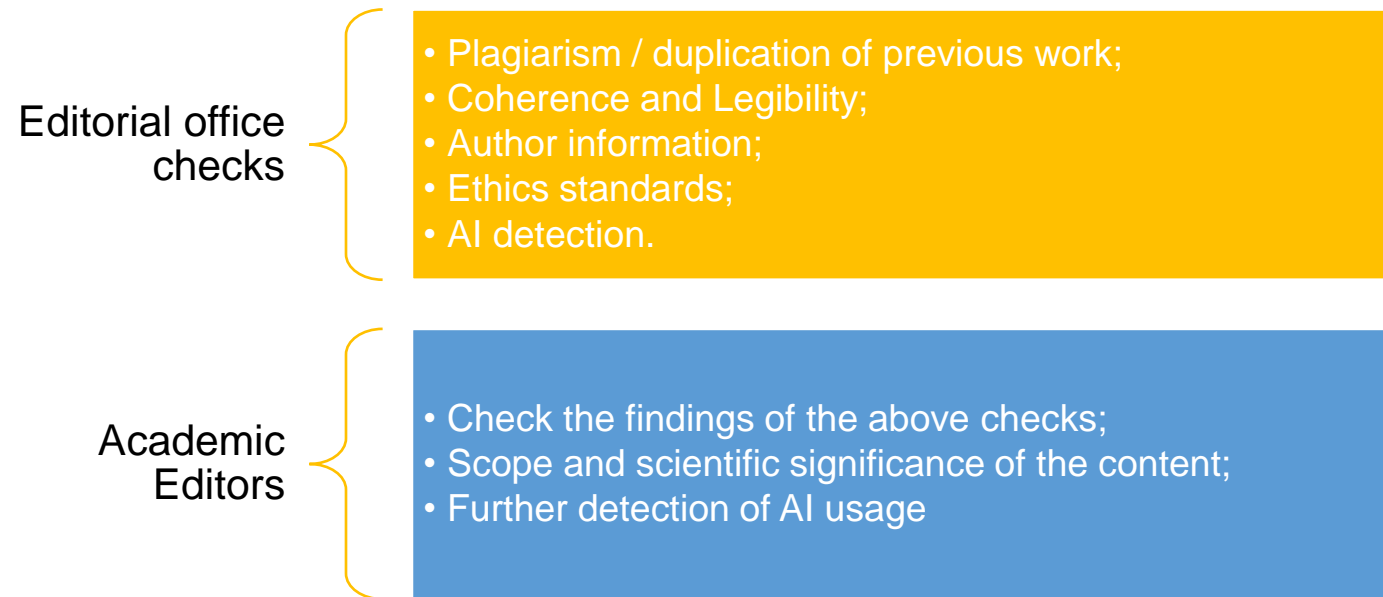

---

# Quality metrics of peer-review

# Pre-Check decision

Rigorous Manuscript Screening: Initial checks for relevance, originality, and adherence to submission guidelines.

# Peer-review

- MDPI operates mostly Single-blind review, however authors can choose Open Review.
- Reviewer profile: Reviewers must hold a PhD, cannot have published with the authors in the last 3-5 years, retain any Col with the authors and must have recent publications in the field of the manuscript.
- Review requirements: At least 2 reports per manuscript are collected, unless there is a substantial difference between the evaluation of the reports, in which case extra reports may be sought.
- Multiple Review Rounds: Two rounds of revisions are normally undertaken by each manuscript and upon Academic Editor request an additional round of revision can be performed.

More info at <https://www.mdpi.com/reviewers>

# Final Decision

Academic Editors make decisions independently, based on:

- Review reports
- Novelty
- Significance of content
- Quality of Presentation
- Scientific Soundness
- Interest to readers
- Language
- Ethical issues
- Overall Merit

In cases where a reviewer has recommended rejection, but others have recommended acceptance, **multiple** academic editors will be asked to make a final decision.

---

# Ethical Standards and Policies

# Research Integrity and Publication Ethics

**Publication ethics** refers to a range of **ethical standards, policies, and guidelines** that are aimed at ensuring the **integrity, quality, and validity** of published research in science.

**Publishers** hold a key responsibility for ensuring that these standards are met for all publications!

## Mechanisms to ensure compliance:

### During submission

- Detailed policies outlining expectations
- Submission compliance checks
- Editorial Board supervision and oversight

### Post-publication

- Complaints process
- Post-publication amendments (corrections, Expression of Concerns, retractions)

# Voice of Academic 2023 survey

Our customer satisfaction with Peer Review process.

The results capture quality rankings that take into account:

- (1) detailed and informative review reports
- (2) reviewer experiences
- (3) useful feedback for the manuscript.

**95%**

of submitting authors rate their overall experience with the MDPI publication process as Excellent or Good (Springer Nature report 89%)

## PEER REVIEW SATISFACTION RATINGS

**91%**

of Submitting Authors rate their overall experience with the MDPI peer review process as Excellent or Good.

**82%**

of Reviewers rate their overall experience with the MDPI peer review process as good/excellent (Springer Nature report 87%).

**81%**

of Guest Editors a rate their overall experience with the MDPI peer review process as Excellent or Good
